

3rd CINE CONFERENCE

Challenges and Opportunities in BECCS in Brazil.

Julio Romano Meneghini

RCGI and USP, e-mail: jmeneg@usp.br

Green hydrogen will play an important role in the decarbonization of the Brazilian Economy. In addition to conventional forms of production, such as through electrolysis employing solar and wind energy, the reform of bio-methane and/or ethanol to hydrogen production has shown enormous potential. In this presentation, green hydrogen production routes and the role of this fuel in the climate agenda are discussed.

Support/Acknowledgements:

We gratefully acknowledge support of the RCGI – Research Centre for Greenhouse Gas Innovation, hosted by the University of São Paulo (USP) and sponsored by FAPESP – São Paulo Research Foundation (2014/50279-4 and 2020/15230-5) and Shell Brazil, and the strategic importance of the support given by ANP (Brazil’s National Oil, Natural Gas and Biofuels Agency) through the R&D levy regulation.
