

FAPESP's Direct PhD Fellowship

<https://fapesp.br/bolsas/dd>

- We are seeking for a motivated student to develop a PhD Project which main aim is to characterize electrocatalysts for the electrochemical conversion of methane into valuable products, with emphasis in single nanoparticle experiments.
- The student will work with electrochemical techniques and perform several in situ studies.
- Experience in electrochemistry is highly desirable. Advanced level of English is mandatory to develop part of the project abroad.
- Please, send an email with a short CV (2 pages max). Write also 2 paragraphs about you!

Supervisor: Prof. Pablo S. Fernández (IQ-UNICAMP) – pablosf@unicamp.br

Co-Supervisor: Fabio Coral Fonseca (IPEN) - fabiocf@usp.br
